PLAS - O - GRAM <97-12>

PLAS Associates,

A. ACAT I Program Codes

The office of the Under Secretary of Defense for Acquisition & Technology updated the Major Defense Acquisition Program (MDAP) list.

The new list dated 16 September 1997 made the following changes:

Added:

NA035 MLRS UPGRADE - Multiple Launch Rocket System Upgrade ND011 NTW - Navy Theater Wide Ballistic Missile Defense ND012 MEADS - Medium Extended Air Defense System (Army Executive Agent)

Removed:

NN003 AOE6 - Fast Combat Support Ship (90% complete)

NF006 CMU - Cheyenne Mountain Upgrade (90% complete)

NF008 DSP - Defense Support Program Satellite program (90% complete)

NF016 JTIDS - Joint Tactical Info Distribution System(now ACAT III)

B. Other Program Code Changes

Reinstated by popular demand:

NP010 - Performance Based Assessment Model (PBAM) - Use this program code for all effort to complete the initial PBAM deployment of PBAM or for subsequent recalculations of the model. Does not include routine use of model results.

New Exercise Program code:

NEXER - Exercises & Wargame Participation - Includes all effort to plan for, participate in and debrief from DCMC HQ sanctioned exercises and war games. Positive Force '98 demonstrated the need for this code. Please note you are not required or encouraged to go back and change timecard entries for this exercise.

Performance Plan Task 5.6 deleted:

NP039 CAO Input Contracts & Mods into MOCAS - Task 5.6, the FY98 Performance Plan task that spawned this code, has been deleted. DCMC HQ desires that the program code also be hidden.

These program code changes will be available in PLAS 1 November 1997. An updated listing of all program, leave and work codes is attached

Respectfully
Don Peterson
